

RITIK DUBEY

Dear Company,

I'm an Engineer turning dreams into realities.

I've always been a great problem solver, an independent introvert, and a technophile obsessed with the latest devices. To unlock my potential and achieve unimaginable elements.

I have always been interested in technology and its potential to transform and impact millions of lives around the globe and I always wanted to be a part of something huge like this, since then, I've worked on projects and have been involved with a handful of titles, and I am getting into software development on my own time.

I'm familiar with a variety of programming languages, including C and C++, HTML, CSS, and many more but I'm always adding new skills to my repertoire.

If so, then you need to look no further. You will see from my enclosed resume that I meet all of these qualifications and more.

Thank you for taking the time to review my resume. I look forward to talking with you.

Sincerely,
Ritik Dubey
